## Disease-oriented SWGs

### Hematopoietic stem cell transplantation & other cell-based therapies & Normal hematopoiesis
- MS cells
- Stem cells
- Granulocyte & constitutional marrow failure disorders

### Malignant lymphoid diseases
- Lymphomas
- EWALL
- CLL (ERIC)
- MM

### Malignant myeloid diseases
- AML
- CML
- MPN
- MDS

### Anemias & related diseases
- Red cells & iron

### Platelet disorders
- Thrombocytopenia & platelet function disorders

### Blood coagulation & hemostatic disorders
- Bleeding & thrombosis

### Pediatric hematology
- Pediatric hematology

## Overarching SWGs

- Aging in hematology
- Quality of life
- European Scientific Foundation for Laboratory Hemato Oncology / Diagnosis in hematological malignant lymphoid diseases
- Precision Hematology / Immune therapies for hematologic disorders & infections in hematology
- Transfusion medicine
- Genetic Predisposition to Blood Cancer (Rare diseases)

## 24 SWGs

Based on Research Roadmap (RR) sections

- Hematopoietic stem cell transplantation & other cell-based therapies & Normal hematopoiesis
- Malignant lymphoid diseases
- Malignant myeloid diseases
- Anemias & related diseases
- Platelet disorders
- Blood coagulation & hemostatic disorders
- Pediatric hematology
